

Colourful, exciting artwork to transform office environments

# EyeSpace

Product information

Specification valid from 19th July 2010.

## EyeSpace Curved Canvas

Integrate artwork and architecture with these high quality canvas prints mounted onto flexible backings.

The EyeSpace Curved Canvas was developed in response to demand from architects and interior designers for a robust fabric print that was capable of being moulded around curved surfaces. With a 70mm return and a clever internal structure that maintains a perfect surface finish, these panels create a dramatic focal point in any workplace interior.

Images may be selected from the EyeSpace online galleries. Alternatively we will research and produce images to meet your exact requirements, or we can use artwork that you supply yourself.

These are bespoke products so please contact us for a quotation, or for further information.
